Scrum Application to the Project

> **Product / Output:** Create a presentation about Scrum; create a sitemap; create a website wireframe.

I. Product Backlog

User Stories	User Points
As a student, I need to watch lecture videos from my instructor, so that I will be equipped with knowledge in creating the required output.	10
As a student, I need to research more about Sitemaps and website wireframes, so that I could create the sitemap and wireframe specified in the required output.	7
As a student, I need to create a word document about the application of Scrum in my project, so that I accomplish the tasks in the required output	5
As a student, I need to create a sitemap concerning my project website, so that I accomplish the tasks specified in the required output	5
As a student, I need to create a website wireframe regarding my project website, so that I accomplish the tasks specified in the required output.	5
As a student, I need to create a PowerPoint presentation, so that I could discuss what I learned about Scrum.	5
As a student, I need to research more about Scrum, so that I could create a presentation about scrum for the required output.	7
As a student, I need to create a plan on how to tackle the required output, so that I could be efficient in creating the required output.	7
As a student, I need to create a video recording about what I learned about Scrum, sitemaps, and wireframes, so that I accomplish the tasks specified in the required output.	4
As a student, I need to upload and finalize my tasks, so that I could finally complete the required output.	4

II. Sprint Backlog

User Stories (why, what)	Associated Task (how)
As a student, I need to watch lecture videos from my instructor, so that I will be equipped with knowledge in creating the required output.	Watch lecture videos
As a student, I need to create a plan on how to tackle the required output, so that I could be efficient in creating the required output.	To create a plan
As a student, I need to research more about Scrum, so that I could create a presentation about scrum for the required output.	To research more about Scrum
As a student, I need to research more about Sitemaps and website wireframes, so that I could create the sitemap and wireframe specified in the required output.	Research more about Sitemaps and website wireframes
As a student, I need to create a PowerPoint presentation, so that I could discuss what I learned about Scrum.	Create a PowerPoint presentation
As a student, I need to create a word document about the application of Scrum in my project, so that I accomplish the tasks in the required output	Create a word document about the application of Scrum
As a student, I need to create a sitemap concerning my project website, so that I accomplish the tasks specified in the required output	Create a sitemap concerning my project website
As a student, I need to create a website wireframe regarding my project website, so that I accomplish the tasks specified in the required output.	Create a website wireframe regarding my project website
As a student, I need to create a video recording about what I learned about Scrum, sitemaps, and wireframes, so that I accomplish the tasks specified in the required output.	Create a video recording about what I learned
As a student, I need to upload and finalize my tasks, so that I could finally complete the required output.	Upload and finalize my tasks

III. Sprint Planning

SPRINT 1

Task Precedence	Tasks that need to be done
1	Watch lecture videos
2	To create a plan
3	To research more about Scrum
4	Research more about Sitemaps and website wireframes
5	Create a PowerPoint presentation
6	Create a word document about the application of Scrum
7	Create a sitemap concerning my project website
8	Create a website wireframe regarding my project website
9	Create a video recording about what I learned
10	Upload and finalize my tasks

IV. Daily Scrum

Tasks that need to be done	Done?
Watch lecture videos	Done
To create a plan	Done
To research more about Scrum	Done
Research more about Sitemaps and website wireframes	Done
Create a PowerPoint presentation	Done
Create a word document about the application of Scrum	Done
Create a sitemap concerning my project website	Done
Create a website wireframe regarding my project website	Done
Create a video recording about what I learned	In Progress
Upload and finalize my tasks	Not yet Started

V. Sprint Review

Products/Outputs	Review
Create a presentation about Scrum	Product was submitted
Create a sitemap	Product was submitted
Create a website wireframe	Product was submitted

VI. Sprint Retrospect

• What went well in the Sprint?

The process of chunking down the goal into small manageable steps helped in being efficient in accomplishing the goal for the sprint.

• What could be improved?

-Earlier submission

-Better presentation

• What will I commit to improve in the next Sprint?

-To have better with time management.

-Be mindful of slipping into habits of procrastination.

-Avoid distractions.
